THANKSGIVING BIRD COUNT

Thanksgiving (Window Watch) Bird Count

Name: _____
Address: _____
City: _____
State: _____ Zipcode: _____

Location of Count: _____
Date: _____ Temp: _____
Time: Begin _____ End _____
Weather: _____
Habitat Type: _____
Feeders/Baths Type: _____
Feeders/Baths Number: _____

Procedures for Count:

Select a circular area on the ground, 15 feet in diameter, to include feeders, bird baths, shrubs, water areas, etc. Imagine the circle extending upward as a cylinder.

Record the species and number of individual birds which come into this cylinder during a one hour period. Try to judge the actual number of individuals which are making visits to the Circle, or which fly through the Cylinder. Try NOT to count the same bird over and over again!

Please print clearly the number of each species in the IN column. Any species seen outside the Circle, should be listed in the OUT column.

Pick any ONE-HOUR period on THANKSGIVING DAY.

Please send your count results (even if no birds were seen) to:

Dr. John G. Hewston
Natural Resources Building
Humboldt State University
Arcata CA 95521

OR
submit your count on line by emailing:
